

SALT SYSTEMS

and Understanding

A SMARTER, SOFTER WAY
TO ENJOY YOUR POOL

Salt systems use a natural process to keep your pool water clean, clear, and easy to enjoy—
with fewer harsh chemicals.

WHAT IS A SALT SYSTEM?

A salt system is a way to produce chlorine naturally for your pool using a small amount of salt. Unlike traditional chlorine, salt chlorination creates a softer, more comfortable swimming experience.

THE BENEFITS

SOFTER WATER

Feels silky smooth on your skin and is gentler on eyes and hair.

LOWER CHEMICAL USE

Reduces the need to handle, store, and add chlorine frequently.

COST EFFICIENT

Less ongoing chemical purchases mean more savings over time.

CONSISTENT SANITATION

Provides steady, automatic chlorine production for better water quality.

CONVENIENCE

Once installed, your system does the work for you.

INCREASES ENJOYMENT

Cleaner, clearer, and more comfortable water for you and your family.

HOW A SALT SYSTEM WORKS

HOW MUCH SALT DOES MY POOL NEED?

Most pools need between
2,700–3,400 ppm of salt.

That's about 1/10th the salt
level of ocean water—barely
noticeable in taste.

GOOD TO KNOW

Salt does not evaporate,
so it only needs to be
added occasionally.

COMMON QUESTIONS

- Q** Will my pool taste salty?
A No. The salt level is so low you won't even notice it.
- Q** Is a salt pool more corrosive?
A When maintained properly, no. Balanced water is the key to protecting your pool and equipment.
- Q** Can I still use chlorine?
A Yes. Most salt systems allow you to boost chlorine manually when needed.
- Q** Do salt cells last forever?
A No. Salt cells typically last 3–7 years depending on usage and water balance.
- Q** Can salt systems be used in spas?
A Yes! Many systems include spa mode for convenient and efficient sanitization.

★ PRO TIP

Proper water balance
is essential for your
salt system to work
effectively and
maximize cell life.

TRUSTED SALT SYSTEM BRANDS

We install and service the industry's
most reliable systems.

SALT SYSTEM MAINTENANCE TIPS

- ✓ Test water regularly and keep it balanced.
- ✓ Clean the salt cell as recommended.
- ✓ Keep salt levels in the ideal range.
- ✓ Ensure proper circulation and filtration.
- ✓ Schedule professional service for peak performance.

REGULAR SERVICE
KEEPS YOUR SYSTEM
RUNNING EFFICIENTLY

*We've got you
covered!*

Better Water. Easier Care. More Island Time.

Our experts make pool ownership simple
so you can spend less time worrying and
more time enjoying your backyard.
