

PREPARING YOUR POOL FOR ARIZONA MONSOON SEASON

BE PREPARED. BE PROTECTED. ENJOY PEACE OF MIND.

Arizona monsoons bring heavy winds, dust, debris, and intense rain. A little preparation goes a long way in protecting your pool, equipment & investment.

ARIZONA
STRONG.
POOL
READY.

BEFORE THE STORM PREPARE & PROTECT

- ☐ **Check the Forecast**
Stay informed and watch for storm warnings in your area.
- ☐ **Clean Your Pool Thoroughly**
Remove leaves, dirt, and debris. A clean pool is easier to maintain after heavy rain.
- ☐ **Check & Clean Baskets**
Empty skimmer and pump baskets. This helps your system handle heavy debris.
- ☐ **Brush & Vacuum**
Brush walls, steps, and pool floor. Vacuum to waste if needed.
- ☐ **Secure Loose Items**
Remove or secure patio furniture, umbrellas, planters, and décor. High winds can cause damage.
- ☐ **Lower Water Features**
Turn off waterfalls, bubblers & fountains to prevent strain on your system.
- ☐ **Check Equipment Area**
Ensure equipment is secure and clear of debris. Close and latch all equipment covers.
- ☐ **Store Pool Toys & Floats**
Remove toys, floats & cleaning equipment. They can become wind hazards and trap debris.
- ☐ **Test & Balance Water**
Balanced water helps your pool recover faster after storms. (We're happy to do this for you!)

DURING THE STORM SAFETY FIRST

- ☐ **Stay Safe**
Avoid going outside during severe weather. Your safety comes first.
- ☐ **Leave Equipment On**
Keep your pump running if safe to do so. Continuous circulation helps filter debris and maintain water quality.
- ☐ **Monitor If Possible**
Check on your pool from a safe distance. Do not access equipment during lightning or heavy storms.
- ☐ **Do Not Add Chemicals**
Wait until after the storm has passed and conditions are safe.

AFTER THE STORM RESTORE & RECOVER

- ☐ **Remove Debris**
Skim the surface and remove leaves, twigs, and debris around the pool.
- ☐ **Clean Baskets**
Empty skimmer and pump baskets again. Heavy debris can clog quickly.
- ☐ **Check Water Level**
Heavy rain can raise your water level. If needed, allow it to return to the proper level.
- ☐ **Inspect Equipment**
Look for any visible damage or unusual sounds. Report concerns to your technician.
- ☐ **Run Your System**
Run your pump and filtration system for several hours to clear out fine debris and restore circulation.
- ☐ **Allow Us to Handle the Rest**
We will test your water, rebalance chemicals, and ensure your pool is back to perfect.
- ☐ **Relax – We've Got You Covered**
Our team is here to protect your pool before, during & after every storm. You enjoy Island Time.

MONSOON REMINDER

Dust, dirt, and rain can quickly affect your water balance.
Trust your Island Time professional team to keep your pool clear, clean, and protected.

PROTECT YOUR POOL
Preparation helps prevent damage and keeps your pool beautiful.

SAVE TIME & MONEY
